Re : Rotary Service

On the following dates, the specified areas of the building will be exterminated as part of an entire building rotary service.

This is a service using the best available resources to the pest control industry. Please throw out all excess paper products, which are harborage areas for roaches and other pests. There is no need to empty your cabinets. All items on top of refrigerator must be removed so refrigerator may be pulled out for service. Please do any cleaning behind refrigerator prior to our service. Please refrain from using any store bought liquid sprays after our treatments. Immediately report any type of water leaks to the office in your building. Please be aware that this treatment may cause the problem to actually get worse for a while. Within weeks this will subside completely.

Thank You for Your Cooperation and Understanding!
