**Re : Pest Prevention Service**

**Your unit will be treated on \_\_\_\_\_.**

**This is a service using the best available resources to the pest control industry. We will be using a Gel bait product to treat for insects. Please be as neat as possible to eliminate competing food sources for the insects. All items on top of refrigerator must be removed so refrigerator may be pulled out for service. Please do any cleaning behind refrigerator prior to our service. Please refrain from using any store bought liquid sprays after our treatments. Throw out all excess paper products, which are harborage areas for roaches and other pests. Immediately report any type of water leaks to the office in your building. You DO NOT need to empty your cabinets. Please be aware that this treatment may cause the problem to actually get worse for a while after your unit has been fully treated. Within weeks this will subside completely.**

**Thank You For Your Cooperation And Understanding !**
